

12V Automatic Battery Charger

2A / 10A Charger
& 55A Engine Start

**Safely charges 12V lead-acid batteries
Designed for safe, professional
& rapid charging.**

Specifications

- Dimensions 5.13"W x 9.6"L C 6.3"H
- Weight 12 lbs
- Input Voltage 120V AC 60Hz
- Output Voltage 12V DC
- Output Current 2A / 10A / 50A
- Internal Protection Self-Resetting Breaker
- Input Voltage 120VAC @ 60Hz
- Reverse Polarity Indicator LED
- Charging Complete Auto Shut-off LED

Use for:

ATV

Automotive

Marine

Features

- Provides DC regulated output current for maximum and safe charging
- Charges batteries in only 8-10 hours
- Dual rate, (2A or 10A) charge setting
- 55 Amp Engine Start
- Built-in circuit breaker helps protect against short circuits
- Automatic - will not overcharge batteries
- Heavy duty cables and corrosive - resistant clamps
- Rugged case with sturdy handle
- Reverse polarity protection prevents sparking in case of improper connection, shown by green LED indicator
- Safe to use with sensitive on-board electronics
- Easy-to-read display shows the current flowing from the charger to the battery
- Slide switch allows the user to select the charge rate based on battery size
- 55 Amp Engine Start
- Built-in "battery full" circuit automatically tapers the current as the battery approaches full charge and discontinues the current when it reaches a full charge
- Small, lightweight & portable
